Amana Connect — managing your mosque's page

This guide walks you through the day-to-day management of your mosque's page on Amana Connect. No technical skills are needed: everything is done from your phone or computer, in a few clicks.

1. Logging in

Go to amanaconnect.org, click “Admin access” at the bottom of the homepage, then enter the email and password you were given.

The dashboard shows your mosque's name, the number of announcements and events online, and shortcuts to each section.

2. Prayer times

Managed under Settings. For each prayer (Fajr, Dhuhr, Asr, Maghrib, Isha), you enter two times:

- Adhan: the time of the call to prayer.
- Iqama: the time the congregational prayer actually starts. This is the time shown larger on the public page.

On Fridays, Jumu'ah automatically replaces Dhuhr on the public page. The Dhuhr time is not lost: it stays shown discreetly, for people who cannot come to the mosque that day.

Important

Always enter your mosque's real times. The “Suggest” button offers automatically calculated times, but it is only a filling aid — you know the real schedule applied at your mosque, and that is what worshippers should see.

3. Announcements

In the Announcements section, you can:

- Create a new announcement: title, content, and optionally a link to an external audio message.
- Publish or Unpublish: a Draft announcement is only visible to you; once Published, it appears on the public page.
- Pin an important announcement: it stays shown first. Unpin to return to normal order.
- Edit or Delete an existing announcement. Deletion is permanent — you will always be asked to confirm.

Amana Connect — managing your mosque's page

4. Events

Same principle as announcements (create, publish, edit, delete), plus a start date and time. Past events are automatically moved to an archive; upcoming events stay featured on the public page.

5. Members (imams, elders, advisors, team)

Add the people who run the mosque: imam, elders, advisors, team. For each one, enter their name, a category, and optionally a specific role (e.g. “Head Imam”).

This list is not public

It will only be visible to worshippers after the people concerned have explicitly agreed. You can build it up calmly, without automatic publication.

6. Mosque settings

Still under Settings: general information (name, city, neighborhood, contact details) and exporting your data if needed.

7. Viewing the public page

From the dashboard or the navigation bar, the “View page” link opens your mosque's public page as visitors see it.

8. Installing the app on your phone

- Android (Chrome): menu (three dots, top right) → “Install app” or “Add to Home screen”.
- iPhone (Safari): share icon (square with an arrow) → “Add to Home Screen”.

Once installed, you can view the latest saved information even without an internet connection — a banner will let you know you are offline and the date the displayed information was last saved.
